

Muhammad Naeemullah

Senior Angular Developer | Front-End Engineer | AI-Assisted Software Developer

📍 Lahore, Punjab, Pakistan ✉ naemdev.667@gmail.com 📞 (+92) 317 174 4667

🐙 github.com/naeemlabs 🔗 linkedin.com/in/naeem-ullah 🌐 Portfolio

Professional Summary

Senior Angular Developer with 5.5+ years of experience designing and developing scalable enterprise web applications using Angular, TypeScript, RxJS, and modern front-end architecture. Experienced in building reusable UI components, integrating RESTful APIs, optimizing application performance, and delivering responsive, maintainable solutions following industry best practices.

Skilled in AI-assisted software development using Claude Code, Cursor AI, ChatGPT, and modern developer workflows to accelerate development, improve code quality, automate repetitive tasks, and build intelligent user experiences. Passionate about clean architecture, performance optimization, mentoring developers, and continuously learning emerging AI technologies.

Technical Skills

Front-End Development: Angular (v14–20), TypeScript, JavaScript (ES6+), RxJS, Angular Signals, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Angular Material

Angular Architecture: Standalone Components, Lazy Loading, Route Guards, Dependency Injection, Reactive Forms, Component Architecture, State Management, Performance Optimization, Change Detection, Responsive UI Development

State Management: RxJS, NgRx Store, NgRx Effects, BehaviorSubject, Observables, Redux Toolkit

Backend & APIs: Node.js, Express.js, MongoDB, RESTful APIs, Firebase, Authentication, JWT, Authorization, API Integration, Payment Gateway Integration

AI Development: OpenAI API, Claude API, Gemini API, Prompt Engineering, AI Chat Integration, Streaming Responses, Function Calling, Structured Outputs, AI-assisted Development

AI Developer Tools: Claude Code, Cursor AI, ChatGPT, GitHub Copilot, VS Code AI Extensions

Tools & Practices: Git, GitHub, Postman, npm, CI/CD, Agile/Scrum, Code Reviews, Debugging, Reusable Components, Clean Code, SOLID Principles

AI Development

AI-Assisted Development

Experienced in using modern AI development tools to accelerate software engineering workflows, including code generation, debugging, refactoring, documentation, UI development, API integration, and architecture planning.

AI Technologies

OpenAI API, Claude API, Gemini API, Prompt Engineering, Streaming Responses, Function Calling, Structured Outputs, AI Chat Applications, AI-powered User Interfaces

AI Tools

Claude Code, Cursor AI, ChatGPT, GitHub Copilot

Professional Experience

Angular Developer

2024 – Present

Codexia Technologies, Lahore, Pakistan

- Designed and developed enterprise-scale Angular applications using Angular, TypeScript, RxJS, and Angular Material.
- Built reusable and modular UI components, reducing development effort and improving maintainability across multiple projects.
- Integrated RESTful APIs, authentication mechanisms, role-based authorization, and third-party services.
- Optimized application performance through lazy loading, efficient state management, and API optimization.
- Collaborated closely with UI/UX designers, backend developers, QA engineers, and project managers throughout the software development lifecycle.
- Conducted peer code reviews, maintained Git workflows, and mentored junior developers on Angular best practices and clean architecture.
- Leveraged AI-assisted development tools including Claude Code, Cursor AI, and ChatGPT to accelerate feature implementation, debugging, code refactoring, and documentation.
- Participated in Agile ceremonies including sprint planning, task estimation, code reviews, and production deployments.

Front-End / MEAN Stack Developer

2021 – 2024

Beyond Logics, Lahore, Pakistan

- Developed full-stack web applications using the MEAN stack (MongoDB, Express.js, Angular, and Node.js).
- Designed and implemented secure RESTful APIs with JWT authentication and role-based access control.
- Built responsive Angular applications using TypeScript, RxJS, SCSS, Tailwind CSS, and Angular Material.
- Designed MongoDB schemas, optimized database queries, and improved backend performance.
- Integrated Firebase services, payment gateways, cloud storage, and third-party APIs.
- Participated in requirement analysis, UI implementation, API integration, testing, deployment, and post-release maintenance.
- Worked collaboratively within Agile teams while following clean coding standards and Git-based workflows.

Projects

FITINPART — E-Commerce Platform

Auto parts e-commerce platform with advanced product catalog, smart search, admin management, and global shipping API integrations.

Technologies: Angular, RxJS, API Integration

SkyWorld — Admin Dashboard

Role-based admin dashboard featuring dynamic permissions, real-time data updates, analytics tables, and Firebase-powered workflows.

Technologies: Angular, Firebase

Clubhouse Journeys — Golf Management Platform

Transparent golf travel planning platform offering real course and hotel rates with a seamless group booking system.

Technologies: Angular, Booking System

w3Du — 3D Printing Marketplace

End-to-end 3D printing marketplace connecting buyers with verified vendors, instant bids, live tracking, and secure payments.

Technologies: Angular, Marketplace, Payment Integration

City Explorer — Live Streaming Platform

Global live-streaming platform enabling real-time cultural exploration through trusted creators and immersive experiences.

Technologies: Angular, WebRTC

Education

BS in Information Technology
Minhaj University Lahore, Pakistan

2017 – 2021

- CGPA: 2.97/4.00
- Field of Study: Information and Communication Technologies
- **Final Year Project:** *Join Hands to Serve Society* – A donor-connect platform built with AngularJS, HTML, CSS, and Laravel for facilitating aid in money, blood donation, and essentials.

Core Competencies

Angular Development • Enterprise Application Development • Responsive UI Development • REST API Integration • Performance Optimization • Reusable Component Design • State Management • Authentication • Clean Architecture • Agile Development • Mentoring Developers • AI-assisted Software Development
